

# Paints

There are all different kinds of paint. This is one of the paints that I like to use, Oil paint. The next one I like to use is Acrylic paint. Here is another kind of paint, Water color. If you want to paint try using these kind of paints. There are other kinds of paint but these are the most special kinds of paint. So keep on painting. When you are using paint there are certain kinds of paper that you have to use. You have to use the exact paper with the exact paints. You could also use boards to paint on. But not cardboard. These are colors that you could use, pink, light pink, dark pink, yellow, light yellow, blue, light blue, dark blue, green, light green, dark green, purple, light purple, dark purple, orange, light orange, dark orange, brown, black, white, gray, gold, silver. And these are some shades of colors that you could mix together to get a pretty color. Blue, pink, and yellow. Here is another one purple, pink, and blue. And another one, orange, purple, and white. Try all of them. And if they don't work try again and if they don't work again then sorry. I hoped you liked reading this. Have fun!
